**OUR MINIMUM  
 ANNUAL TARGET**  
 £7500

Shalom Delhi is a project that cares for people and families affected by HIV/AIDS. Its services are comprehensive providing medical, psycho-social and livelihood support via its hospital, home based care and community programmes. Through its patient-centered, compassionate and competent services, Shalom is providing much needed care for some of the most marginalised and under-served groups of people in society. Our focus is to help with financial support for the Livelihood Programme. This is effectively a training programme to give practical skills that equip AIDS sufferers with the capacity to earn a living to support themselves and their families. A key area is training in sewing and tailoring.

Dr Savita Duomai is head of Shalom Delhi which is a project linked with Emmanuel Hospital Association. Dr Savita has specialised in the care and rehabilitation of those suffering from HIV/AIDS. She is totally committed to this ministry and is an inspiring example of someone who is giving themselves to the needs of the poorest of the poor. India has the highest number of HIV/AIDS sufferers in the world and the project that she is overseeing is addressing the significant variety of challenges that this disease brings.
